

IN THE CLAIMS:

Please ADD new claims 20-32 in accordance with the following:

1. (ORIGINAL) Headwear for hunting, comprising:
a wearing portion for being worn on a head of a wearer; and
a visor portion projecting from the wearing portion,
wherein the visor portion comprises:
a base member for forming a shape of the visor portion, the base member having at least one seeing-through portion; and
a light control member attached to at least one side of the base member such that the light control member covers the seeing-through portion and the wearer can see through the light control member when the headwear is worn on the head.
2. (ORIGINAL) The headwear of claim 1, wherein at least two seeing-through portions are provided at the base member, the seeing-through portions being arranged such that at least one seeing-through portion is provided at each side of the base member with respect to its central portion.
3. (ORIGINAL) The headwear of claim 1, wherein the light control member comprises a mesh.
4. (ORIGINAL) The headwear of claim 1, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head of the wearer.
5. (ORIGINAL) The headwear of claim 1, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the wearer.
6. (ORIGINAL) The headwear of claim 1, wherein the light control member is made of at least one of fabrics, plastics, and metals.
7. (ORIGINAL) The headwear of claim 1, wherein the light control member is provided with a camouflage pattern.

8. (ORIGINAL) Headwear for hunting, comprising:
a wearing portion for being worn on a head of a wearer; and
a visor portion projecting from the wearing portion,
wherein the visor portion comprises:
a base member for forming a shape of the visor portion, the base member being made of a transparent material; and
a light control member attached to at least one side of the base member.
9. (ORIGINAL) The headwear of claim 8, wherein the light control member comprises a mesh.
10. (ORIGINAL) The headwear of claim 8, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head of the wearer.
11. (ORIGINAL) The headwear of claim 8, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the wearer.
12. (ORIGINAL) The headwear of claim 8, wherein the light control member is made of at least one of fabrics, plastics, and metals.
13. (ORIGINAL) The headwear of claim 8, wherein the light control member is provided with a camouflage pattern.
14. (ORIGINAL) Headwear for hunting, comprising:
a wearing portion for being worn on a head of a wearer; and
a visor portion projecting from the wearing portion,
wherein the visor portion comprises:
a circumferential member for forming a shape of the visor portion, the circumferential member defining a hollow space therein; and
a light control member attached to at least one side of the base member.
15. (ORIGINAL) The headwear of claim 14, wherein the light control member comprises a mesh.

16. (ORIGINAL) The headwear of claim 14, wherein the wearing portion is hemispherically shaped such that the wearing portion covers the entire head of the wearer.

17. (ORIGINAL) The headwear of claim 14, wherein the wearing portion is a headband that enables the headwear to be elastically sustained at the head of the wearer.

18. (ORIGINAL) The headwear of claim 14, wherein the light control member is made of at least one of fabrics, plastics, and metals.

19. (ORIGINAL) The headwear of claim 14, wherein the light control member is provided with a camouflage pattern.

20. (ORIGINAL) The headwear of claim 14, wherein the circumferential member is made of at least one of a wire and a plastic.

20. (NEW) A method of forming headwear, comprising:
forming a first portion to be worn on a head of a user; and
forming a second portion to be looked through by the user and to block a reflection from an eye of the user.

21. (NEW) The method of claim 20, further comprising:
selectively attaching/detaching the first portion to/from the second portion.

22. (NEW) The method of claim 20, wherein the forming of the second portion comprises forming a visor defining a plurality of holes therein.

23. (NEW) The method of claim 20, wherein the forming of the second portion comprises:
forming a base member; and
disposing a mesh member over or below the base member.

24. (NEW) The method of claim 20, wherein the forming of the first portion comprises forming a headband.

25. (NEW) The method of claim 24, wherein the forming of the first portion further comprises forming an elastic portion to fit on the head of the user.

26. (NEW) The method of claim 20, wherein the forming of the second portion comprises:

forming a transparent visor; and
disposing a mesh member over or below the visor.

27. (NEW) The method of claim 20, wherein the forming of the second portion comprises:

forming a visor having a circumferential member; and
covering the circumferential member with a mesh member.

28. (NEW) The method of claim 27, further comprising:
combining ends of the circumferential member with the first portion.

29. (NEW) The method of claim 27, further comprising:
combining a perimeter of the circumferential member with the first portion.

30. (NEW) The method of claim 20, wherein the forming of the second portion comprises providing a base portion to define a space therein, the user looking through the space.

31. (NEW) The method of claim 30, wherein the forming of the second portion further comprises attaching a mesh to the base portion.

32. (NEW) A method of forming headwear, comprising:
forming a wearing portion to be worn on a head of a user;
forming a visor, comprising:

forming a base member to define a shape of the visor, the base member comprising a seeing through portion therein, and

attaching a mesh member to a top or a bottom of the base member; and
attaching the wearing portion to the visor.
